Reference

Ladies and Gentlemen,

It's our pleasure to acknowledge the assignment of Prosol IT employees to our project in Mugardos, Spain. Prosol IT was on site in Mugardos from 19.09.2005 until 31.12.2006 in the project "Integrated Information Management System".

Contracted personnel was Mr. Huebsch who held the position of IT interim manager. Additionally to leading the greenfield implementation of the SAP ECC 5.0 modules FI, CO, MM, PM, as well as of the ERP systems OCEN and Sigmafine, Mr. Huebsch was responsible for quality control, budget, and deadline control for all IT activities. This included the setup of the data processing center and the control center as well as test and training management.

Furthermore, Prosol IT employees were responsible for data gathering and the input of master data into the SAP system.

The structured, target-oriented working methods of Prosol IT added to the project's success. Especially the professional project management allowed for considerable savings. The completion of work packages by Prosol IT was always carried out to our complete satisfaction. We hold the Prosol IT employees in high regard due to their personal as well as professional competency. We can recommend them unreservedly as project managers and consultants.

Kind regards
TGE Gas Engineering GmbH

Andreas Hambücker
Head of Engineering
